

Coding goals:

Understand how to talk to a computer by typing commands.

Use coding to solve problems with variables.

Use coding to create visuals with fractions.

Introduction to Variables and Comments

Does the output change if you change a comment?

Can you change the code so that it will print 5?

08:00

Strings

Print all the names of the people in your group!

08:00

Variables for linear equations

See Python lesson on this topic.

08:00

Concatenating Strings = combining strings together

Print a sentence for each person!

08:00

Object oriented programming using fractions

Assign your variable to be a fraction.

Solve fraction math problems like these:

08:00

$$\frac{4}{5} + \frac{1}{2} =$$

$$\frac{2}{3} \div \frac{1}{10} =$$

$$\frac{1}{2} \div \frac{3}{4} =$$

$$\frac{4}{5} - \frac{1}{2} =$$

$$\frac{1}{2} \times \frac{3}{5} =$$

Complex Fraction Operations

Can you make an equation where the answer comes out to be 20?

1?

0?

1,000,000

08:00

Shout outs!

Highlight students who worked well together.

Celebrate students' successes and identify challenges.

Lesson 2a

Recall how we used pictures to represent fractions in day 0.
Here, we let the computer draw them.

Representing fractions using pictures

Use the coding to show different fractions.

What is the biggest denominator you can make?

Can you make a fraction greater than 1?

08:00

$$\frac{4}{4}$$

$$\frac{2}{3}$$

$$\frac{9}{10}$$

$$\frac{2}{5}$$

$$\frac{2}{6}$$

$$\frac{5}{10}$$

$$\frac{1}{3}$$

$$\frac{2}{4}$$

Multiple fractions using pictures

Use the coding to show 4 equivalent fractions.

Use the coding to show 3 fractions in order from least to greatest.

Use the coding to show skip counting by $\frac{1}{4}$'s to get to 2 wholes.

08:00

$$\frac{4}{4}$$

$$\frac{2}{3}$$

$$\frac{9}{10}$$

$$\frac{2}{5}$$

$$\frac{2}{6}$$

$$\frac{5}{10}$$

$$\frac{1}{3}$$

$$\frac{2}{4}$$

Shout outs!

Highlight students who worked well together.

Celebrate students' successes and identify challenges.
