

Welcome to Coding week!

Be Leaders, co facilitators

Be determined

Be diverse

Show teamwork!

Be respectful

Be on task

Everything is recorded!

Vocabulary check in!

Raise your hand to share what you know about these terms:

Distance:

Time:

Rate:

Distance, Rate and Time in Tables

- a. A police car drives 236 km in 3 hours.
What is its average speed in kilometers per hour?

Hours	Kilometers
3	236

$$y \div x = \text{COP}$$

$$\text{distance} \div \text{time} = \text{rate}$$

Rate / COP / Speed in the middle

Distance, Rate and Time in College

Distance = Rate x Time

Rate = Distance $\div$ Time

Time = Distance $\div$ Rate

Computing Rate

10:00

#1 Assignment: understanding rates

Solve the problems in #1 using tables or rules

Start #2 if you finish early

Distance = Rate $\times$ Time
Rate = Distance $\div$ Time
Time = Distance $\div$ Rate

Hours	Kilometers
3	236

•78.6

Coding groups

Assign student groups.

1. Group 1:
2. Group 2:
3. Group 3:
4. Group 4:

10:00

Computing Rates

Check #1 with your team!

Computing Rate

10:00

With your team

Solve the problems in #2-3 using tables or rules

Complete #4 if finished early

Distance = Rate $\times$ Time
Rate = Distance $\div$ Time
Time = Distance $\div$ Rate

Time	Distance
3	236

•78.6

New Handout!
Complete the tables
Write equations $y = COP \bullet x$
Graph

10:00

a. Squirrel

equation

x (hours)	y (miles)
0	0
1	11
3	33
4	
	88

Check with your team!

10:00

a. Squirrel

equation

x (hours)	y (miles)
0	0
1	11
3	33
4	
	88

Diverse Story!

10:00

#1 Assignment: modifying tables

1) Who is racing?

We will compare _____, using time in _____ for x and distance in _____ for y.

Our race will last this time: _____

Our race will last this distance: _____

10:00

- a. _____ made by _____ has a constant of _____ per _____
 - b. _____ made by _____ has a constant of _____ per _____
 - c. _____ made by _____ has a constant of _____ per _____
 - d. _____ made by _____ has a constant of _____ per _____
- 

10:00

_____ made by _____
has a constant of _____ per _____

equation

x	y

Graph:

Question:

- 1) Who is going the fastest? How can you tell from the equations?
- 2) Who is going the slowest? How can you tell from the graphs?
- 3) How do the tables help support these answers?

10:00
