

Coding groups

Assign student groups.

1. Group 1:
2. Group 2:
3. Group 3:
4. Group 4:

Entry question:

How could coding help us check our work from yesterday?

Welcome to Coding week!

Be Leaders, co facilitators

Be determined

Be diverse

Show teamwork! = share the trackpad and the keyboard, everyone tries!

Be respectful

Be on task

Everything is recorded!

10:00

Introduction to Variables

Assignment: understanding comments and variables

Print different numbers by storing them in a variable

06:00

Strings

Assignment: understanding strings

Print different messages by storing them in a string

15:00

Video interpretation

Complete the front and back questions on the handout for the example video

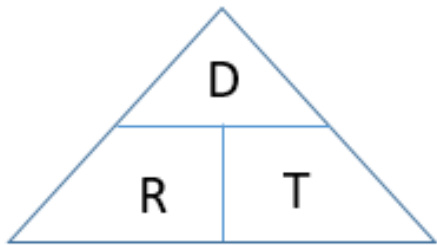

Pay attention to the mathematical thinking that is behind the video!

Computing Rates

#1 Assignment: understanding rates

Solve the problems in #1 using tables or rules

Start #2 if you finish early

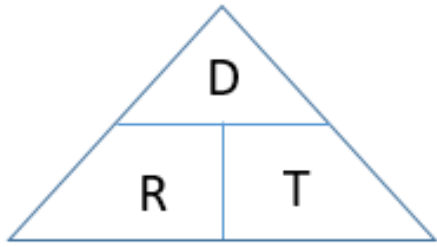

Distance = Rate $\times$ Time
Rate = Distance $\div$ Time
Time = Distance $\div$ Rate

Hours	Kilometers
3	236

•78.6

Distance = Rate x Time

Rate = Distance $\div$ Time

Time = Distance $\div$ Rate

10:00

Computing Rates

Assignment: understanding rates

Solve the problems in #1 using the coding

10:00

Computing Rates

Assignment: Compute distances from rates

Solve the problems in #2 using the coding

10:00

Computing Rates

Assignment: Compute times from rates
Solve the problems in #3 using the coding

10:00

Working with Lists

Assignment: Print a list

Assignment: Print a list of strings

Name:

Date:

Things I learned about
coding:

Things I learned about
Math (distance, rate, time,
equations)
