

Coding groups

Assign students into groups.

1. Group 1:
2. Group 2:
3. Group 3:
4. Group 4:

Welcome to Coding week!

Be determined

Be diverse

Show teamwork! = share the trackpad and the keyboard, everyone tries!

Be respectful

Be on task

Everything is recorded!

Welcome to Coding week!

Be leaders:

College leader: “_____, what can you show us about this section?”

Co-Facilitator student: “I want to add on” or ask “can I show them this part?”

10:00

Tables and object-oriented programming

1. Why is the speed 1 mile per hour? Discuss within your group.
2. Click on the generated table image and open it.
3. Change the file name to "table.png".
4. Verify that you can open the new file.

10:00

10:00

Create tables for different speeds

1. Create the tables on your handout for the animals
2. Within your group, discuss are these speeds more realistic?

10:00

Plot multiple tables

1. Create correct graphs and compare
2. Who wins and how can you tell?
3. Make a mistake in a table, what happens to the graph?

12:00

Make videos I: Find character images

Find all three or four characters

WATCH THE TIME LIMIT

10:00

Make videos II: Create tables for your characters

Create a table for your first character

REPLACE elephant with your character's name
everywhere here:

```
Elephant = table() # <- FIX name
```

10:00

Make videos II: Create tables for your characters

Find this section:

Line equations of tables

10:00

Make videos III: Place your characters

Find this section:

Line equations of tables

10:00

Make videos IV: Make the video

Find this section:

Line equations of tables

10:00

Make videos V: Experiment with your video

Find this section:

Line equations of tables

10:00

**Make videos VI: Make title and
explanatory text images**

Find this section:

Line equations of tables
